

**Disaster risk reduction requires
access solutions made for the
purpose.**

The SST Flex

Looks like a standard sliding door but in the event of an emergency, users can open the door panels and sidelites by hand (breakout function).

dormakaba

The ESA300 Sliding Door

Designed for interior or exterior applications where emergency breakout of the sliding and sidelite panels is required.

Panic Hardware

When everyone is in a hurry to get out during an emergency, panic hardware ensures that the process is quick so that no one is left behind
