Why Door Hardware?

Architect, builder or designer – you find the door hardware solution for your residential or commercial project in the dormakaba product cluster. Security, function, and visual appeal are the foundation of door hardware that architects, builders, designers and end users expect from dormakaba. With the use of high-grade materials, precise production techniques and a comprehensive quality management system, dormakaba provides solution for all type of door applications. From controlling movement of door to secured locking solutions, from Elegant door furniture to smoke and acoustic seals we offer the right solution for the right application.

Door Closers

Door Closer

Cam Action Technology

The dormakaba CAM action door closer combines technical superiority with outstanding value, and unites advanced design with convenient functionality - all on the basis of its heart shaped cam. The doorclosers are manufactured as per European Standard EN 1154.

All the doorclosers are tested for durability of 500,000 cycles.

Door Closer

Cam Action Technology

The dormakaba concealed door closer has ushered in a new era in door closer technology. The closer body and slide channel are so compact that they can be installed out of sight in doors and their frames. These devices offer the same high quality expected of dormakaba door closers, as characterised by their ease of operation for the user, and wide range of functions. The doorclosers are manufactured as per European Standard EN 1154.

All the doorclosers are tested for durability of 500,000 cycles.

Floor Spring

Successfully tailored to satisfy the special requirements governing floor springs for double action doors, dormakaba floor springs offers a particularly shallow design and thus all the advantages of a reduced installation depth. With two closing ranges and a choice of models, the floor spring can fulfill virtually any application requirement while providing all the reliability associated with assured quality from dormakaba. The floor springs are manufactured as per European Standard EN 1154.

All the door closers are tested for durability of 500,000 cycles.

BTS 80

Universal application, individual functions and assured quality

**Features**

- Proven, robust design capable of withstanding leaf weights of upto 300kg
- Constant, temperature-independent closing cycle
- Highly efficient mechanism gives maximum user convenience

BTS 75V

Faster aligned fit

**Features**

- Constant, temperature-independent closing cycle withstanding leaf weights of upto 120kg
- Highly efficient mechanism gives maximum user convenience
- Slim product range offering all functions
- Easy installation

BTS 84

Double action floor spring

**Features**

- Thermo constant smooth operation
- High mechanical efficiency for easy door opening
- Proven, robust unit for door weights upto 100kg
- Concealed unit for invisible installation
- Minimum floor recess dimension

BTS 65

Light Traffic Double Action Doors

**Features**

- Smooth closing operation virtually temperature immune
- Optional integrated single-point hold-open at 90°
- Rugged construction for door weights upto 100kg
- Minimum floor recess dimension

RTS 85

Transom concealed door closer

**Features**

- Thermo constant smooth operation
- High mechanical efficiency for easy door opening
- Proven, robust unit for door weights upto 100kg
- Concealed unit for invisible installation
- Minimum floor recess dimension

Multipoint Locks

No-one gets by you guys.

Well, there are three
of us!

Multi Point Locks

Whether it's your family, home or office – security is essential. dormakaba multipoint locking systems provide multiple protection against intruders with high-quality primary and lateral locks. And these systems also help protect against excessive noise and energy wastage because the additional locking points keep the door particularly tight against its seal. These high levels of protection are available for virtually almost any individual door situation. Both in domestic and commercial buildings, dormakaba multipoint locking systems provide versatile anti-intruder protection for wide stile and narrow stile doors.

Strike suitability for different profiles on application

Further optional advantages of dormakaba multipoint locking systems

- For escape routes (e.g. M-SVP series)
- Automatic locking function
- Combination with electronic access control possible
- For single or double-leaf doors
- Deadlocking with 20 mm deadbolt projection
- All components integrated in the door for easy installation and maintenance
- Rotating bolts and center bolt of steel; center bolt projections from 20 mm to 27 mm

Escape Locks

dormakaba Escape locks offer compelling benefits, thanks to assured high quality and functional integrity combined with long service lifetimes. With high-grade materials, careful manufacturing and a comprehensive quality management system, these products are able to satisfy virtually all the technical requirements ever likely to arise. Conforming to BS EN 12209, BS EN 179 or DIN standards, dormakaba locks offer unbeatable performance, safety and security.

180 Mortise lock

Features

- Emergency Escape Lock
- Backset: 55mm
- Forend width : 20mm
- DIN Left/Right
- DIN 18650 for fire and smoke check doors
- Forend finish : SS

181 Mortise lock

Features

- Emergency Escape lock and key operated latch
- Backset : 55mm
- Forend width : 20mm
- DIN Left/Right
- DIN 18650 for fire and smoke check doors
- Forend finish : SS

182 Mortise lock

Features

- Escape lock with split 9 mm square follower
- Backset : 55mm
- Forend width : 20mm
- DIN Left/Right - outward / inward opening
- DIN 18650 for fire and smoke check doors
- Forend finish : SS

183 Mortise lock

Features

- Escape lock
- Backset : 55mm
- Forend width : 20mm
- DIN Left/Right - outward / inward opening
- DIN 18650 for fire and smoke check doors
- Forend Finish : SS

Anti Panic Locks

Doors that lock immediately after each closure with the deadbolt being automatically advanced – this is the clear advantage offered by the automatic action locks SVP/SVZ. At the same time, the clawbolt latch engages providing a "two point locking". The emergency escape function of the SVP locks ensures that the door can be easily opened at any time from the inside simply by pressing the lever handle.

SVP 4000

Features

- An electrically monitored switch lock with integrated tamper proof detectors for monitoring the latch and deadbolt
- Backset : 55-65mm
- CTC : 72mm
- DIN Left/Right
- Fire rated

SVP 5000

Features

- A purely mechanical lock with an emergency escape function
- Backset : 55-65mm
- CTC : 72mm
- DIN Left/Right
- Fire rated

SVP 2000

Features

- Motor lock with a sequential control for maximum safety and tamper-proof detectors
- Backset : 55-65mm
- CTC : 72mm
- DIN Left/Right
- Fire rated

SVP 6000

Features

- An electrically switch-monitored lock with a split follower for the electrical engaging/ disengaging of the external lever handle and tamper-proof detectors
- Backset : 55-65mm
- CTC : 72mm
- DIN Left/Right
- Connection : 12 V DC or 24 V DC, stabilized, current consumption: max. 0.4 A or 0.2 A, contact rating: max. 30 V DC, 100 mA.
- Fire rated

SVZ 6000

Features

- Access control lock same as with the SVP 6000 but without the emergency escape function
- Backset : 55-65mm
- CTC : 72mm
- DIN Left/Right
- Fire rated

Cylinders

Cylinders

dormakaba europrofile cylinders are – literally – the “key” to locking system security on both external and internal doors. From the quality basic cylinder with conventional flat key system to high-grade reverse key versions for elevated security requirements, dormakaba has a wide range of options offering excellent resilience and effective anti-tamper protection. High-quality, matched materials ensure excellent corrosion and wear resistance, while certified manufacture provides precise, reliable functionality and durability. Trust dormakaba for technically sophisticated solutions in a comprehensive cylinder portfolio – with the right level of protection aligned to individual requirements and strong performance throughout.

Euro Profile Cylinder

Features

- 5 Pin EPC
- Lengths : 60, 70, 80, 90mm
- Approved to EN 1303
- Both side key operation
- Finish : Satin nickel plated

Features

- 5 Pin EPC
- Lengths : 60, 70, 80, 90mm
- Approved to EN 1303
- One side Key Operation
Other side Thumb Turn
- Finish : Satin nickel plated

Features

- 5 Pin EPC
- Lengths : 60mm
- Approved to EN 1303
- Thumb turn coin release function
- Finish : Satin nickel plated

Half Cylinder

Features

- Lengths : 42mm
- Approved to EN 1303
- Finish : Satin nickel plated

High Security Cylinders

dormakaba high security cylinders with reversible keys offer highest user convenience, as the key has no top or bottom side. As opposed to serrated keys they can be inserted into the cylinder lock from either side. dormakaba high security cylinders are ergonomically built and meet the highest security standards. Our precision technology guarantees, that these cylinders are robust and require little maintenance, in accordance with EN1303 Key Related Security Grade 6 and with additional security elements Attack Resistance Grade 2.

PENTA Cross

Features

- Patented reversible key system upto 2036
- Protection against duplication/illegal keys
- Upto 22 pins in 5 radically arrange pin rows
- Certification : Kitemark (UK) / GOST (Russia)
- 867 Trillion possible key coding combinations
- Modular core housing technology
- Anti Picking protection
- Anti Drilling protection
- Anti Bump protection
- Movable security element provides higher security and protection against copying of keys
- Can be upgraded to an electronic access control systems with RFID transponder in the key head.
- Key issue protection with security card
- One key platform for various lock types

Expert Plus

Features

- Patented reversible key system upto 2033
- Protection against duplication/illegal keys
- Upto 22 pins in 4 radically arrange pin rows
- Certification : Kitemark (UK) / GOST (Russia)
- 907 billion possible key coding combinations
- Modular core housing technology
- Anti Picking protection
- Anti Drilling protection
- Anti Bump protection
- Can be upgraded to an electronic access control systems with RFID transponder in the key head.
- Key issue protection with security card
- One key platform for various lock types

p Extra+

Features

- Patented serrated key system upto 2032
- Protection against duplication / illegal keys
- 6 Pin cylinder
- Certification : Kitemark (UK) / GOST (Russia)
- Approx 1600 combinations per profile
- Modular core housing technology
- Anti Picking protection
- Anti Drilling protection
- Anti Bump protection
- Branch and groove design, active blocking pin for protection against illegal keys
- Key issue protection with security card
- One key platform for various lock types

In all high security cylinders, master key system is free add on and is inbuilt part of the cylinder

Functions for High Security Cylinder

Self changing cylinder – the cylinder with 3 lives

Double key override function

Emergency override key function

Secure Access Temporary – SAT

Keyway in normal position: 6 o'clock

Keyway in service position: 8 o'clock

Extreme protection – increased burglary protection

Pulling and drilling protection

Thermally insulated cylinder – TIC

Protection mechanism against dust, weather and insects

Cylinder types

- Double, single and thumb turn cylinders in Euro profile, Swiss round profile, Scandinavian and Union oval profiles, French round profiles
- Outside and inside cylinders for surface mounted locks
- Furniture cylinders and locks
- Camlock cylinders
- Key switch cylinders
- Elevator control cylinders
- Padlocks
- Window handles and olives
- Key deposit tubes
- Key storage cabinets

Lever Handles

Premium Lever Handle

The dormakaba Premium range of door furniture offers aesthetically and technically sophisticated solutions capable of meeting high project related demands. With the Premium range, identical lever handles can be combined with precisely matched roses, escutcheons and backplates for use on timber, narrow stile and toughened glass doors. The system comprises three components that can be flexibly combined with one another: Lever handles, roses/backplates and a square section spindle. The entire Premium range is able to satisfy virtually any design related requirement. From the modern to the classic. The wide choice of models offers an impressive indication of the high standard of quality available with the dormakaba brand.

Hinges

Concealed Hinges

CONCEALEO® door hinges are setting the trend. Even though demands for functionality are growing - modern door hinges cater to a wide range of load bearing capacities - the hardware needs to be as invisible as possible from the outside. With the CONCEALEO® product range, dormakaba provides an all-embracing product line-up. With load bearing capacities of 40 to 350 kilograms per pair, it covers the entire door spectrum from the simple domestic door to the highly complex commercial property door. The choice of material provides the basis for creating a range of concealed hinges for all door weights. dormakaba only uses true steel for the hinge's body which is machined, not cast.

Features

- Three dimensional adjustable hinge
- 180° opening angle
- UL listed and fire rating versions also available
- Material : Steel/Aluminium
- Approved to EN 1935
- 11 different finishes available

Model	Load carrying capacity (kg)
GS 40	40

Panic Hardware

Panic Hardware

dormakaba offers a comprehensive range of high-quality panic hardware fittings with horizontal and vertical locking for doors in emergency exits and escape routes – applications in which safety, reliability and aesthetic attractiveness are indispensable requirements. dormakaba's PHA and PHB products cover in full the hardware requirements that arise in public-frequented facilities such as hospitals, universities and schools, concert halls, shopping malls, hotels and administrative buildings.

PHB 3000

Touch Bar

Features

- PHB 3000 Touch bar
- One/Two/Three/Four point locking
- Fire rated
- Approved to EN 1125

PHA 2000

Push Bar

Features

- PHA 2000 Push bar
- One/Two/Three/Four point locking
- Fire rated
- Approved to EN 1125

Exit Pad

The fittings of the Exit Pad series are high-quality emergency exit devices for doors in escape routes and can be combined with the components of the PHA 2000/PHB 3000 series. They are used in buildings with no public pedestrian traffic. It is expected that people using the building are familiar with the exits and their fittings, avoiding the likelihood of a panic situation developing. All products of the Exit Pad series have been tested to and certified compliant with EN 179.

Features

- One/Two point locking
- For door widths upto 1300mm
- Non handed
- Fire rated
- External fittings can be used
- Approved to EN 179

Types of locking

One point locking

Two point locking

Three point locking

Four point locking

Three point locking over rebated door

Five point locking over rebated door

External Trim and Glass Kit

External fitting with lever handle or knob, suitable for use with PHA 2000 and PHB 3000. All PHT external fittings or non-handed and carry the CE mark dormakaba's PHA 2000 and Exit Pad devices can be fitted to a wide range of toughened glass doors.

PHT 01

PHT 03

PHT 05

PHT 06

PHT 07

Features

- External fitting with lever handle or knob
- Suitable for use with PHA 2000 and PHB 3000
- All PHT external fittings and non-handed and carry the CE mark

Euro profile half cylinder

Features

- EPC half cylinder
- Lengths : 42mm
- Approved to EN 1303
- Finish : Satin nickel plated

PHA Glass kit

Features

- PHA Glass kit A/B/C/D/E/F
- For doors in all glass or framed assemblies
- For 8 to 10 mm toughened safety glass
- Standard stainless steel design
- Approved to EN 1125

Accessories

Door Stop - Wall Mounted with Coat Hook

Door Stop - Wall and floor Magnetic

Mortise Shaft Lock

Seals

For doors and windows to function, they must have gaps between their edges and their frame, these gap allow intrusion of noise, smoke, fire, rain, insects etc. The solution is to get the right seal for right door type which seals the gap around the doors when closed to seal against combination of intrusions and leakages. Properly fitted, they can provide a complete and continuous seal for all door type that will not impede normal use.

Automatic Door Bottom Seals

IS8010si

Features

- Concealed fixing
- Location : Single and double butt hinged doors
- Available lengths : 820, 920, 1070, 1220mm
- Seal Material : Silicon rubber
- Fire rated

IS8090si

Features

- Face mounted or semi mortised
- Location : Single and double butt hinged doors
- Available lengths : 920, 1070, 1220, 1500mm
- Seal Material : Silicon rubber
- Fire rated

IS8100si

Features

- Concealed heavy duty seal
- Location : Single and double butt hinged doors
- Available lengths : 920, 1070, 1220, 1500mm
- Seal Material : Silicon rubber
- Fire rated

Threshold Plate Seals

IS4220

Features

- Location : Door sill
- Seal size : Available in stock lengths
- Seal Material : Silicon rubber
- Fire rated

Seals

Perimeter Seals

IS1212BT

Features

- Location : Around rebated frames of single or double butt hinged doors
- Seal size : Available in doorset sizes
- Seal Material : Rigid PVC
- Fire rated

Intumescent Seals

KP1004

Features

- Location : Mortised into the door or frame stiles and head
- Seal size : Available in stock lengths
- Seal Material : Intumescent infill with flexible PVC Holder

Astragal Seals

IS7060si

Features

- Location : Meeting stile of double butt hinged doors
- Seal size : Available in stock lengths
- Seal Material : Silicon rubber

EM Series

EM electromagnetic locks are reliable and convenient door locking devices that can be readily combined with an access control system. The EM product range offers the right solution for a wide array of structural situations and applications. dormakaba offers a complete portfolio of EM electromagnetic locks. Thanks to the materials selected and comprehensive long-time testing at the development stage, these too meet in full the quality standards set by dormakaba.

Abbreviations

A = Lock status sensor
 D = Shear lock magnets
 F = Front-mounted
 GL = Electromagnetic lock with LED light panel
 H = Surface-mounted
 M = Mortise-mounted

EM Comfort Line Series

EM Comfort Line (EMC) offers complementing locking solution for security access control systems and emergency exit doors. All locks are fail safe mode, meaning that in case of power failure the doors will release ensuring effective emergency exit. Available in all standard holding force fulfilling the majority of security demands.

Abbreviations

- A = Lock status sensor
- D = Shear lock magnets
- F = Front-mounted
- GL = Electromagnetic lock with LED light panel
- H = Surface-mounted

Electric Strikes

dormakaba electric strikes ensure door security in private, public and commercial premises, are suitable for use with many different locks and door types and are available in all conventional operating voltages. Whether for standard doors, fire and smoke check doors or for doors in emergency and escape routes, you will be able to find the right model to match your particular requirements – all quality-assured by dormakaba.

A = Holding function

If the electric strike lever handle is activated momentarily, the mechanism in the electric strike responds, releasing the strike until after the door has been opened. Once-off entry is possible

E = Unlocking

A small lever switches the electric strike off. The door is fully accessible without any signalling from the electric strike.

RR = Monitor contact

A floating contact supplies "Door open" / "Door closed" status signals
